

SDS Authoring

Whether you're working toward compliance with GHS-aligned regulations, or simply need to update your safety data sheets and hazardous product labels, our certified authoring professionals will ensure your documents are in compliance with all local, federal and international hazard communication standards.

SDS Authoring Solutions for a Global Marketplace

As a manufacturer, importer or distributor, you may find yourself responsible for classifying hazardous products and authoring safety data sheets (SDSs) and labels according to hazard communication requirements of every country in which your products are shipped or sold, including the more than 70 countries that have adopted, or are in the process of adopting, the UN's Globally Harmonized System of Classification and Labelling of Chemicals (GHS).

The sheer technical complexity of classifying physical, health and environmental hazards for your products can seem overwhelming, especially when you consider the UN's GHS Purple Book dedicates more than 200 pages to the subject. When you also consider the need to author compliant SDSs and labels, the labyrinth of hazard communication requirements can seem impossible to navigate. Yet, failure to comply may result in lost sales, delayed shipments, substantial fines and penalties, and increased risk to your employees, customers and business.

VelocityEHS Certified Authoring Professionals Can Help!

Our certified authoring professionals have the expertise to handle all of your product classification and SDS authoring needs, no matter where your products are shipped or sold.

We can author, update and translate your SDSs/MSDSs into more than 85 languages, as well as perform a critical review of your existing SDS library to ensure compliance with all applicable state, provincial, federal and international regulations and guidelines, such as UN GHS, US HazCom, Canada WHMIS, and EU CLP. We can also author technical data sheets and custom safety documents for exempt products, including articles and non-hazardous products, as well as custom workplace labels.

Our authoring team members are certified annually by the Department of Transportation (DOT) in Multi-Modal Transport Classification, and carry the Institute of Hazardous Materials Management's (IHMM) Certified Dangerous Goods Professionals (CDGP) designation. Our senior authors maintain Board of Certified Safety Professionals (BCSP) certification, and all team members participate in ongoing SCHC professional development courses.

We deliver an unmatched depth of knowledge and expertise in classifying products, determining hazards and authoring SDSs — easing your compliance burden, and giving you more time to focus on day-to-day operations.

Benefits

Expert Authoring Professionals

Our trained, certified safety and regulatory experts ensure your SDS documents are in compliance and contain the most accurate, up-to-date and reliable information available.

Personalized Service & Support

We work with you one-on-one to gain a comprehensive understanding of both your products and your workplace to deliver the highest quality service available — for the duration of your project and beyond.

Improved Regulatory Compliance

All documents go through a rigorous quality control process to ensure 100% accuracy and compliance with applicable regulations and standards.

Eliminate Your SDS Authoring Burdens

Let us free you from the time and cost required to author, review, translate and update your SDS library, and give you the freedom to focus on other important business goals.
