

# On-Site Chemical Inventory Audit

Our experts will come to your workplace for a thorough chemical inventory audit, helping you easily assess your chemical footprint and stay on top of hazard communication/GHS compliance.

## An Effective Hazard Communication Program Starts with an Accurate Chemical Inventory

Hazard communication regulations—including OSHA’s HazCom Standard and Health Canada’s WHMIS Standard—require businesses to have a complete and accurate inventory of chemicals used in the workplace. For example, in its HazCom/GHS enforcement directive, OSHA makes it clear that inspectors are checking to make sure every hazardous chemical found in the workplace has an up-to-date safety data sheet.

Accounting for every chemical and developing an inventory list can be a difficult, time-consuming job—especially when your resources are limited.

### Take the Hard Work out of Your Chemical Inventory Audit

Let VelocityEHS do the hard work for you. Through our On-Site Chemical Inventory Audit service, our team of experts will come to your workplace to conduct a thorough audit of your chemicals and create a site-specific inventory. During the process, we’ll capture the following details for every chemical product on-site to give you an accurate snapshot of your entire chemical footprint:

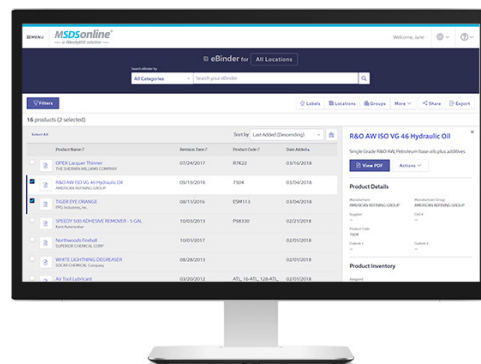

- Product name
- Manufacturer
- Product Code (if applicable)
- Location of the product in your workplace
- Containers (by request)

Used in conjunction with our cloud-based MSDSonline accounts\* and SDS/MSDS Library Building Services, our On-Site Chemical Inventory Audit helps ensure you have an up-to-date SDS library that reflects all the products in your workplace, simplifying compliance with hazard communication requirements.

### Benefits

- **Saves Time & Resources** – Avoid costly, labor-intensive processes of creating your chemical inventory using internal resources.
- **Accurate Results** – Our experienced experts know the right steps to take and the necessary details to capture so you can rest assured your chemical inventory is thorough, accurate and up-to-date.
- **Quick & Affordable** – We offer timely project turnaround and competitive rates. We tailor project scope to the amount of chemicals and locations associated with your inventory.
- **Excellent Customer Care** – Our dedicated project team takes pride in your satisfaction and is available to address questions throughout the process.

For pricing details and additional information, call us toll-free at 1.888.362.2007 (U.S. & Canada Only). Outside the United States, call 1.312.881.2000.

\*The On-Site Chemical Inventory Audit Service is available as an add-on to cloud-based MSDSonline SDS/Chemical Management accounts from VelocityEHS. Contact us or visit [MSDSonline.com](http://MSDSonline.com) to learn more about account options and features.
