

Enviro Tool Kit

Our Enviro Tool Kit gives you on-demand access to hundreds of compliance education resources and leading experts, helping you stay compliant in a volatile regulatory environment.

EHS Compliance Resources

“The versatility and ease of use makes this a very strong product.”

Dave Chapman, Brooks Health System

On-Demand Access to Enviro Compliance Resources

Since the creation of the Environmental Protection Agency (EPA) in 1970, environmental compliance has become a top priority for American businesses. Staying within EPA guidelines is vital to any organization that generates, transports, treats, stores or disposes hazardous waste, emits contaminants into the air, or discharges pollutants into the water.

However, many businesses find environmental rules to be complex and difficult to understand. Further compounding the challenge, many states have adopted their own compliance rules, which can be more comprehensive than the federal rules. For example, most states now impose stricter requirements for chemical reporting, facility siting, asbestos abatement, and air and water discharge limits.

To stay on top of these ever-changing state and federal requirements -- such as RCRA, CERCLA, CAA, CWA and hazardous waste -- you need 24/7 access to an industry-leading environmental compliance tool. Our Enviro Tool Kit puts practical regulatory analyses, activity information, news, and critical compliance tools at your fingertips.

- State-Specific Regulatory Analyses
- Continuous Regulatory Updates
- Checklists, Forms & Guidance Documents
- Weekly EPA Regulatory Newsletters.

Benefits

Make Training Easier

The Safety Tool Kit, from VelocityEHS, has everything you need including downloadable and customizable training presentations, checklists, meeting schedules, quizzes and handouts.

Reduce Costs

Minimize workers' compensation claims through training and effective accident investigation, and lower your legal fees by handling routine compliance questions yourself.

Work Smarter

Find best practices from other companies as well as plain-English regulatory analyses, all from one convenient source on the Web.

System Requirements

- Internet access
- All standard browsers
- Adobe® Reader® 9+
- VGA resolution of 800x600 or higher recommended
