

# Workplace Training Premium Package

We offer flexible eLearning options and dozens of workplace training courses to help you satisfy federal and state regulatory compliance requirements.

## eLearning Solutions

*“Very satisfied with MSDSonline.”*

Dave Holden, Williams International

One of the best ways to reduce workplace accidents is to ensure employees are familiar with hazards they may encounter in the workplace. This can be achieved through the implementation of an effective employee training program. For many companies, traditional training models are often expensive and time-consuming, and do not always lead to desired outcomes.

Luckily, today on-demand training provides employers with a great alternative to traditional methods. It improves efficiencies for both trainers and trainees and eliminates the negative impact that classroom-style training can have on productivity. It can be implemented as a stand-alone solution or integrated as part of a larger blended training strategy.

See for yourself why companies big and small are leaving behind old-fashioned methods in favor of flexible training solutions that better engage employees and provide more meaningful outcomes.

### Centralized On-Demand Training

MSDSonline's on-demand training is the perfect solution for companies that want complete control over the deployment, tracking, reporting and content of their training programs.

With our Premium Package, you get access to our extensive course library, containing nearly 100 expert-reviewed workplace safety topics. Plus, you receive online tools to create and upload your own content, import legacy content from third parties, report on enrollments organization-wide, and customize training

environments for a range of learners and corporation goals. You can also add job-specific or organization-specific policies, SOPs, manuals, diagrams, and more.

Our Premium Package empowers you to manage all of your online, virtual and classroom training activities with automated tracking and reporting based on the goals and parameters you set. You control every aspect of your training program through one easy-to-use, centralized application.

With MSDSonline, creating and managing a top-quality training program to achieve your business objectives couldn't be easier. It's on-demand training in a scalable, fully-hosted environment.

### Training Categories

The following are examples of course topics covered in our expansive training library: Hazard Communication, Workplace Safety, Environmental Compliance, DOT Compliance, Emergency Planning, Personal Protection, HR Employment, and Lab Safety.

Visit [www.MSDSonline.com](http://www.MSDSonline.com) to review the complete list of courses.

**Discover for yourself why companies large and small are choosing MSDSonline, a VelocityEHS solution, as their Workplace Training solution.**
